

## Checklist - Preparing for the moving day

### Final preparations

- ✓ Make ready all of the things you currently need. Pack these specially so that they can be easily found, e.g. tools, documents, keys, medication, etc.
- ✓ Secure your equipment (washing machine, computer, etc.) for transportation.
- ✓ Keep your first aid box ready for any small injuries that might occur, e.g. splinters or cuts to the fingers.
- ✓ Ensure that parking spaces are available with access to the entrance to your building.  
Also let your neighbours and the caretaker know that you are moving.

### Providing food and drink for the people helping you to move

Your own personal helpers and the staff from a removal firm like small snacks and refreshing drinks. It is wholly up to you whether or not these are provided.

- ✓ Ideal drinks are mineral water, juices, tea and coffee. You should offer your own personal helpers alcoholic drinks only once the move has been completed, if at all.
- ✓ To avoid additional work in the form of dishwashing on the moving day, use paper cups and plates. This will save you the problem of dirty delph.
- ✓ Depending on the season, you can offer warm or cold dishes, e.g. soups, different salads or sandwiches.
- ✓ Has your kitchen already been stripped by experts? Snack stands, pizza delivery companies and fast food restaurants are good alternatives for appeasing hunger.
